

## How to Set Up a Redwood Node and Open Hush

<https://github.com/redwood/redwood/>

After downloading, open a new terminal and follow these steps:

1. `git clone https://github.com/redwood/redwood.git`
2. `cd ~`
3. `cd redwood`
4. `cd demos`
5. `cd desktop-chat-capp`
6. `cd frontend`
7. `Git checkout -b develop`
8. `Git pull origin develop`
9. `rm -rf node1_data`
10. `yarn`
11. `yarn start`
12. Open a new terminal, and `cd ..` (cd into desktop-chat-app)
13. Go run `. --config node1.redwoodrc --root ./node1_data --dev`
14. A blank white window should pop up and will ask for permission to access the web, please allow
15. Localhost:3000 should open and bring you to the login page.

### **Some of the basic REPL commands to use:**

- `Ctrl + c` - terminate the current command
- `Ctrl + c` twice - terminate the Node REPL

- Up and down arrows - see command history and modify previous commands
- Tab keys list of current commands
- . help - list of all command
- . break - exit from multiline expression
